# Ongoing Projects

## Terminal 1 Redevelopment

# Ongoing Projects

## Long-Term Parking Garage 2

# What's in the ADP

- Forms basis for environmental review
- Includes proposed terminal, roadway, support facilities
- No plans for runway expansion

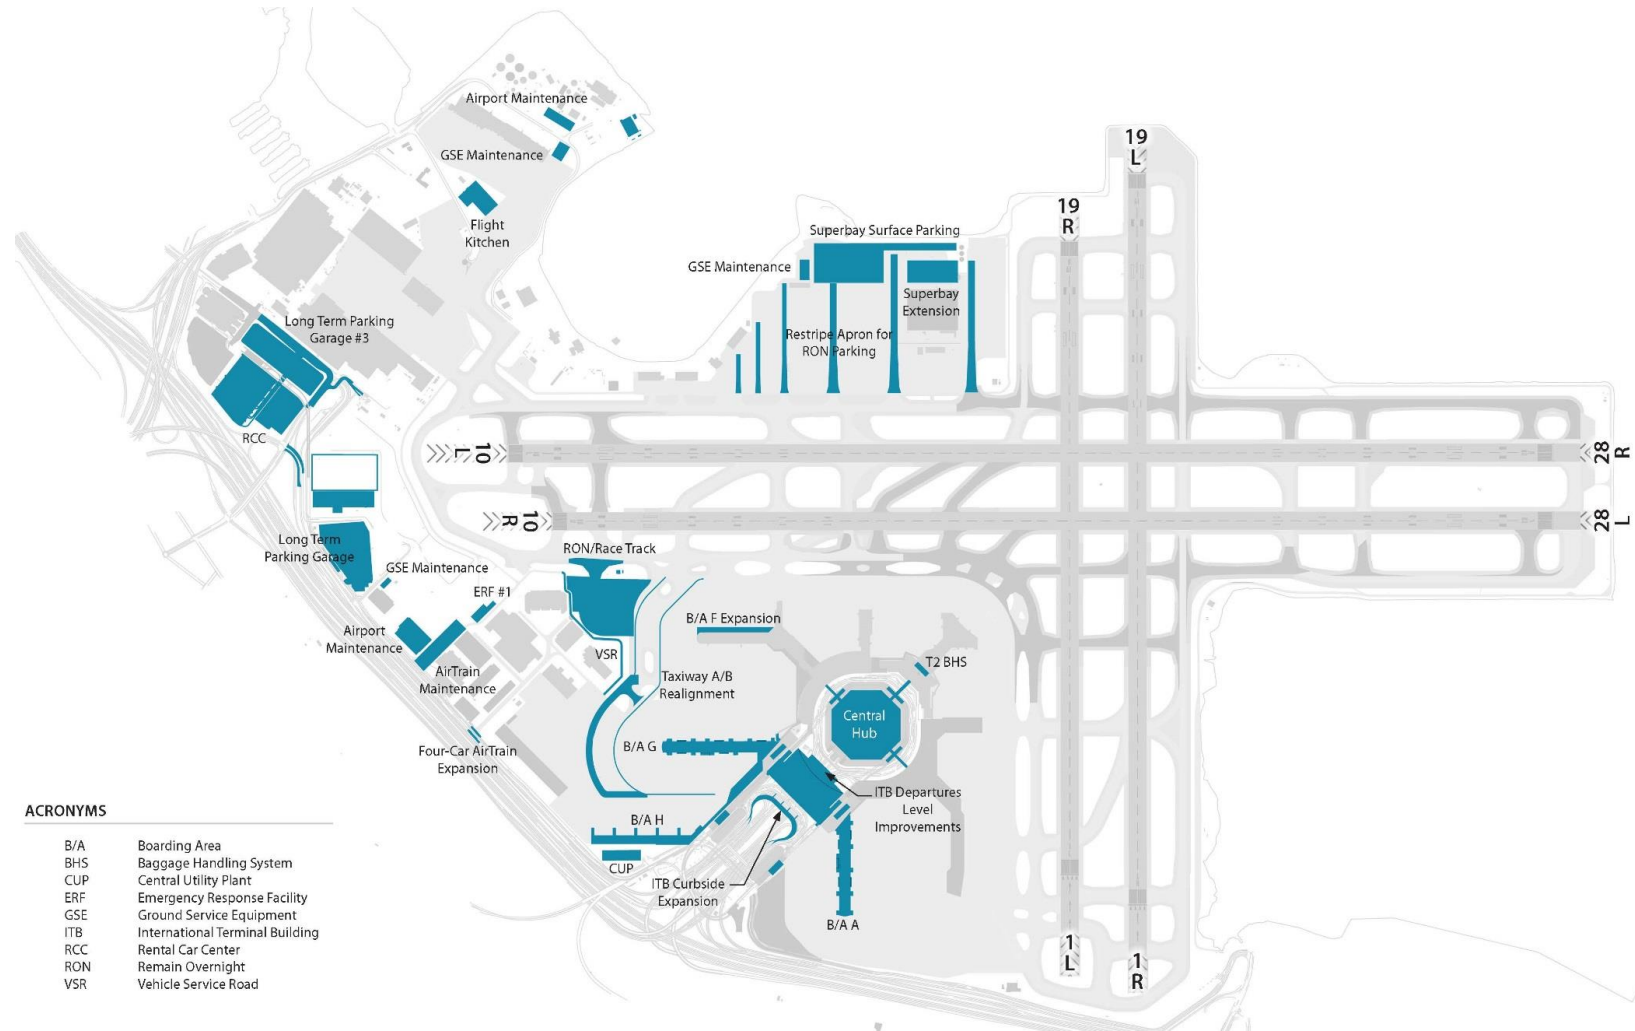

# Goal of the ADP

- Continue to modernize SFO
- Enhance passenger experience
- Match terminal, parking, support facilities to existing runway capacity

# What the ADP won't do

- Won't change runway configurations or flight paths
- Won't expand airport property footprint
- Won't increase runway capacity

# Recommended ADP projects

An aerial architectural rendering of the International Terminal Building Redevelopment project at San Francisco International Airport (SFO). The image shows a large, modern terminal building with a curved, glass-enclosed section and a large, open-air plaza area. The plaza is filled with numerous small, dark, rectangular structures, likely representing seating or landscaping. The building is surrounded by a parking lot and a road. The overall design is modern and functional, with a focus on creating a large, open space for passengers.
