City of Burlingame
Attn: Tim McAuliffe, Water Division Manager
1369 N Carolan Ave
Burlingame, CA 94010

Dear Tim,

Sensus Metering Systems has manufacturing plants in the United States and abroad. Primary meters are manufactured in Uniontown, PA. With distance between our manufacturing plants and the west coast customers, Sensus made the decision to authorize a local distributor in your area for City of Burlingame, namely: Golden State Flow Measurement, Inc. 4821 Golden Foothill Parkway #100, El Dorado Hills, CA. 95762, to sell and service our products.

Golden State Flow Measurement, also known as "GSFM" is a distributor of Sensus products in your area. GSFM maintains nearly 1 million dollars of Sensus meter products to provide timely delivery to a variety of cities and water districts in certain areas of Northern California.

I have been the Sensus Territory Manager for Northern CA since September of 2012. I also work with the City of Burlingame.

Sensus Metering Systems and our authorized distributor, GSFM, are pleased to offer City of Burlingame, a factory authorized, Water Trade-in-Program which can be obtained through GSFM, also formally known as; MXU-Flexnet to SmartPoint Trade-in-Program.

City of Burlingame would have an authorized purchasing account with only GSFM in El Dorado Hills, CA. for the years of 2019 and 2020. Sensus is the manufacturer and GSFM is the authorized distributor for City of Burlingame.
