Re: Burlingame Emergency Cache Program Funding Request

Dear Mayor Colson and Council Members,

The Burlingame Neighborhood Network (BNN) is pleased to report that the number of active Burlingame neighborhoods has grown significantly this year. We have committed all 20 of the emergency caches you funded for the Emergency Cache Program. Our 2019 Disaster Survival Drill and recent earthquakes have spurred additional interest in this effort.

In addition to enabling neighborhoods to be better prepared for disasters, we are pleased that these caches have encouraged more neighborhoods to get involved.

As of today, 20 neighborhoods have received caches or are awaiting delivery of their caches, and there are two additional blocks that are currently working on their applications. Therefore, we would like to request funding of \$4,625.70 to create 10 more caches at this time. The chart attached breaks down the cost of the caches, an annual review and refresh of expired items in existing caches, and the drill materials contained in the caches for use during the Burlingame Disaster Survival Drill or in an actual emergency event. These are the wholesale costs; I am donating the labor costs to order the supplies and assemble them.

Thank you so much for your consideration and support of this Emergency Cache Program, which is making Burlingame a safer city.

Sincerely,

Suzanne Tateosian, BNN Board Member
